ClinicOS

ClinicOS — Client Proposal

Prepared for: [Client Clinic Name]
Date: [Date]
Prepared by: Sagar Bijja, ClinicOS (RH Technology, Pune)

Executive Summary

Thank you for considering ClinicOS for your clinic. This proposal outlines how ClinicOS will replace your current paper/manual processes with a modern, automated clinic management platform — reducing administrative burden, improving patient experience, and helping you see more patients with less effort.

What we're proposing:
- Full EMR system tailored to your specialty
- WhatsApp automation for appointments and prescriptions
- Digital billing with online payment collection
- ABDM-compliant digital health records
- Onboarding, training, and ongoing support

Understanding Your Current Challenges

Most specialty clinics we work with face the same pain points:

PROBLEM	IMPACT
Paper prescriptions and registers	Risk of errors, no searchable history
Manual WhatsApp reminders	30–45 min/day of staff time, missed follow-ups
No-shows without reminders	15–25% appointment loss rate
Delayed billing and follow-up	Payment collection lags by days/weeks
No patient photo records	Difficult to show treatment progress to patients
Non-compliant ABDM / ABHA	Risk of regulatory non-compliance
Disconnected drug information	No interaction checking, manual lookup

What ClinicOS Delivers

For Your Specialty

ClinicOS has purpose-built EMR templates — not generic forms. Here is what your specialty gets:

If you are a Dermatologist:

- **Body diagram** — click on the body to map exactly where a lesion is
- **Lesion characterisation** — type, size, colour, borders, surface documented in structured fields
- **Disease scales** — PASI (Psoriasis), IGA (Global Assessment), DLQI (Quality of Life) with trend graphs

- **Before/after photos** — capture, organise, and show patients their progress with a professional comparison slider
- **Procedure records** — LASER, PRP, Botox, Chemical Peel, Microneedling — all coded and billed
- **Drug alerts** — automatic warning if you prescribe Isotretinoin with Tetracycline, or Methotrexate with NSAIDs

---

If you are a Dentist:

- **32-tooth FDI chart** — click any tooth, record treatment, view history per tooth
- **Periodontal charting** — 6-point probing depths recorded and compared
- **Treatment plans** — create a plan with cost, share with patient via WhatsApp
- **Lab work orders** — crowns, braces, dentures — sent to lab with a click
- **X-ray storage** — attach X-rays to specific teeth, access any time

---

If you are an Ophthalmologist:

- **Visual acuity** — Snellen and LogMAR, OD/OS, unaided/pinhole/BCVA, near vision
- **Refraction** — Sphere, Cylinder, Axis, Add, Prism, Base — full table for both eyes
- **Slit lamp** — Lids, Conjunctiva, Cornea, AC, Iris, Pupil, Lens (LOCS III grading)
- **IOP** — NCT/GAT/iCare readings, CCT entry, colour-coded alert (>21 mmHg)
- **Fundus** — Media, Disc, CDR, Macula, Vessels, Periphery — OD and OS
- **Spectacle PDF** — one click generates a professional spectacle prescription PDF
- **Contact lens PDF** — BC, Power, Diameter, Cylinder, Axis, Brand — ready for dispenser
- **Systemic flags** — Diabetic Retinopathy grading (No DR → PDR+CSME), HTN Retinopathy grade

---

If you are a Physiotherapist:

- **ROM table** — document range of motion for any movement, compare to normal
- **MMT grading** — 0–5 scale per muscle group
- **VAS pain scale** — visual slider with colour severity bands
- **FIM scoring** — 18-item Functional Independence Measure (18–126)
- **Barthel Index** — 10-item mobility assessment with independence interpretation
- **WOMAC** — 24-item pain, stiffness, and function scale for knee/hip OA
- **HEP generator** — create a home exercise programme and send via WhatsApp
- **Treatment modalities** — TENS, IFT, Ultrasound, SWD, LASER, Heat, Ice, Manual Therapy with parameters

---

For Your Day-to-Day Operations

Appointment Management

- Calendar view with doctor, room, and equipment columns

- Walk-in token queue with estimated wait time display on the waiting room screen
- Online booking page (`yourname.clinic0s.com`) — patients book 24/7 without calling
- Advance payment at booking — collect consultation fee online before the appointment

WhatsApp Automation (Zero Staff Effort)

TRIGGER	MESSAGE SENT AUTOMATICALLY
Appointment booked	Confirmation + pre-visit questionnaire link
24 hours before	Reminder with confirm/reschedule button
1 hour before	Final reminder
Post-consultation	E-prescription download link
Lab results ready	"Your reports are ready — view here"
Follow-up due	"Dr. [Name] recommends your next visit on [date]"
Invoice unpaid >3 days	Payment link via UPI/cards
Patient birthday	Personalised greeting

Prescriptions

- Search by generic name or brand name (Indian drug database)
- Dosage auto-suggestion — common regimens pre-filled
- Drug interaction alert — 50+ critical interactions pre-loaded with clinical descriptions
- Patient allergy check — cross-references known allergies before prescribing
- Professional PDF prescription with your letterhead, signature, and clinic stamp
- Sent to patient's WhatsApp with one click

Billing

- GST-compliant invoice (with HSN/SAC codes)
- One-click Razorpay payment link — patient pays via UPI, card, or net banking
- QR code payment for walk-in patients
- Automatic reconciliation — payment status updated when patient pays
- Monthly revenue reports, GST report for your CA

Photo Vault

- Unlimited clinical photos per patient
- Before/after comparison (slider and side-by-side view)
- Body map tagging — photos linked to exact location
- Progress timeline — all photos of same region over time
- Digital consent signature — legally recorded, date-stamped
- Optional encrypted storage for sensitive clinical photos

Implementation Plan

Week 1 — Setup & Configuration

- Clinic profile setup (name, logo, GST number, UPI)
- Doctor profiles and specialties configured
- Services and fees entered
- WhatsApp Business API connected
- Razorpay account linked

Week 2 — Data Migration & Training

- Import existing patient records (Excel/CSV upload)
- Staff training session (2 hours): receptionist workflow
- Doctor training session (1 hour): EMR and prescription
- Test run with 10 real appointments

Week 3 — Go Live

- Live clinic operations on ClinicOS
- Dedicated support contact during first week
- Daily check-in calls for first 5 days

Week 4+ — Optimisation

- WhatsApp templates approved and automation active
- Online booking page live
- Razorpay payment links configured
- Monthly review call

Pricing for Your Clinic

Based on your clinic size, we recommend:

PLAN	INCLUDED	PRICE
Solo	1 doctor, 1 location, unlimited patients	₹999/month
Small	Up to 5 doctors, 1 location	₹1,999/month
Group	Up to 15 doctors, multiple locations	₹3,999/month
Enterprise	Unlimited doctors, custom features	₹7,999/month

All plans include:
- Unlimited patient records
- Unlimited appointments
- WhatsApp automation (subject to Meta API approval)
- GST-compliant billing
- Phone and email support

- Free updates and new features
- 14-day free trial, no credit card required

Optional add-ons:
- ABDM/ABHA integration module — ₹499/month
- Lab integration (Dr. Lal, SRL, Thyrocare) — ₹299/month
- AI voice dictation — ₹2/minute transcription
- Premium WhatsApp template setup — ₹2,999 one-time

Future scope: hospitals, full lab, pharmacy (roadmap)

For **multi-specialty hospitals** and **in-house diagnostics**, ClinicOS is planned to add:

- **Hospital / HIMS tier** with **IPD** (admission, bed management, ward activity, discharge) and **hospital-grade OPD** (multi-department flows).
- **Full laboratory (LIS)** — sample workflow, QC, and results—not only external lab partner links.
- **Pharmacy** — central and satellite dispensing, inventory, purchase, linked to EMR and wards.

Bed capacity is managed as a **licensed limit** set in **platform super admin** (typical minimum **~50 beds** for the hospital offering; higher counts supported per contract). **International rollout** (e.g. **US**, **Malaysia**) will reuse the same product with **country packs** after India is production-stable. Custom healthcare software benchmarks (including firms such as Thinkitive in healthcare engineering) inform expected integration depth; ClinicOS pursues that as a **single product line**, not one-off projects.

If your organisation is clinic-only today, you can adopt now and **grow into** the hospital modules when released—no separate "second system" required by design.

ABDM Compliance

ClinicOS is built to the **Ayushman Bharat Digital Mission (ABDM)** specification:

- **M1 — ABHA Creation:** Your patients get a unique Health ID via Aadhaar or mobile OTP
- **M2 — Health Information Provider (HIP):** Clinical records shared in FHIR R4 format with patient consent
- **M3 — Health Information User (HIU):** Access records from other providers (hospitals, labs) with patient permission
- **Facility QR Code:** Patients scan a QR at your clinic to link their ABHA to your facility

This means your clinic is future-proof as the government expands digital health mandates.

Data Security & Privacy

- All data stored on **AWS** infrastructure in the **ap-south-1 (Mumbai) region**
- HTTPS encryption for all data in transit
- AES-256 encryption for sensitive clinical photos
- Role-based access — receptionist cannot see clinical notes; doctor cannot change billing settings
- Complete audit trail — every action logged with user, timestamp, and IP
- Daily automated backups with point-in-time recovery
- No data sold to third parties — ever

Frequently Asked Questions

Q: Can I import my existing patient data?
A: Yes. We support Excel and CSV import for patient name, phone, date of birth, and medical history.

Q: What happens to my data if I stop subscribing?
A: You can export all your data in PDF and Excel format at any time. We hold your data for 90 days after cancellation for retrieval.

Q: Do I need a computer or can I use a tablet/phone?
A: ClinicOS works on any device with a browser — desktop, laptop, tablet. The mobile app (iOS/Android) is available for doctors on the move.

Q: Does it work offline?
A: Core features require internet connection. We recommend a backup mobile hotspot for uninterrupted clinic operations.

Q: What if my staff doesn't know computers well?
A: The interface is designed for clinic staff with no technical background. Training takes 2 hours. We provide video tutorials in Hindi and English.

Q: How long does WhatsApp API approval take?
A: Meta typically approves new WhatsApp Business accounts in 3–5 business days. We handle the application on your behalf.

Q: Is there a long-term contract?
A: No. Month-to-month subscription. Annual billing gives 20% discount.

Why Clinics Choose ClinicOS Over Other Options

CRITERIA	CLINICOS	GENERIC PRACTICE SOFTWARE	PAPER/EXCEL
Specialty EMR depth	Yes — built for your specialty	No — generic forms	No
WhatsApp automation	Yes — 8 automated triggers	No	No
ABDM/ABHA compliance	Yes — M1+M2+M3	Partial	No
Indian drug database	Yes — 50,000+ drugs	Limited	No
Drug interaction alerts	Yes — 50+ interactions	No	No
Online patient booking	Yes — clinicname.clinic0s.com	Often via third party (extra fee)	No
Razorpay payment links	Yes — built-in	No — separate setup	No
Photo vault	Yes — before/after + consent	No	No
GST invoicing	Yes — automated	Often manual	No
AI dictation	Yes — Hindi + English	No	No
Setup time	1 week	4–8 weeks	Immediate

CRITERIA	CLINICOS	GENERIC PRACTICE SOFTWARE	PAPER/EXCEL
Monthly cost	₹999–₹3,999	₹3,000–₹15,000	₹0

Next Steps

1. **Schedule a 30-minute demo** — we show you exactly how it works for your specialty
2. **Start your 14-day free trial** — no credit card, no commitment
3. **Go live** — with full onboarding support from our team
